## summary.

After more than six enriching years at Capgemini, I am ready for a new challenge where I can further leverage my creativity and expertise. I have gained experience in software engineering within large organizations, including testing code, adopting new frameworks, and deploying features and applications to production.

In addition to my technical skills, I have developed strong soft skills. I organized technical workshops, delivered internal and external tech talks, and authored articles. My communication skills enable me to grasp complex concepts and convey them clearly. With my commitment to clean coding and ambition to contribute to sustainable projects as a senior developer, I am a valuable asset to any team.

**Available from: 15 april 2025**
**Available for: 32 uur per week**
